

SLADJANA MANDARIC

Quality Engineer | Data Analyst | Ads Manager

www.sm-analytics.studio Linkedin Medium Github

Results-driven Quality Engineer with automotive manufacturing experience within the QMS team, combining engineering expertise with strong analytical skills to drive operational excellence and continuous improvement. Experienced in Quality KPI management, process performance analysis, audit management, and quality problem-solving methodologies, including FMEA, Fishbone, and FTA. Comprehensive knowledge of end-to-end manufacturing processes, from stakeholder requirements and product change management to production operations, finished product quality, and customer performance. Proven ability to provide cross-functional engineering and analytical support, translating operational challenges into actionable insights and measurable improvements. Committed to professional growth and expanding technical expertise while contributing to the company's long-term success.

TOOLS & TECHNOLOGIES

Quality Engineering | QMS & tools (Audit Management, Document Management & Control, Non-conformance tracking) • **8D • FMEA • APQP/PPAP • MSA • SPC • 5S • 5 Whys • RCA • PDCA • IATF 16949 • VDA 6.3/6.5 • ISO 9001**
Data Analytics | SQL • Power BI • Advanced Microsoft Excel • Google Sheets • GA4 • Microsoft Azure Data Services • KPI Development & Tracking • Data Cleaning & Quality Validation • Trend Analysis • Process Optimization & Reporting Automation
Languages | Business English /C1 (Cambridge Certificate), proven skills in an English-speaking work environment
Certificates | Excel Advanced (Academy) • **Data Analyst Professional Certificate** (Google) • **Ads Management** (Google) • **Professional Trainings in Microsoft Tools, Power BI, & SQL, QMS tools & practices** (Continental AG)

EXPERIENCE

Digital Analyst - Ads Manager • Freelance — Jan 2026 - Ongoing

- Designed interactive automated dashboards in Power BI and Looker Studio to track ad spend, website traffic, and revenue metrics in a single view, saving reporting time.
- Implemented GA4 and GTM event tracking architectures to monitor custom user paths, identify churn points, and optimize overall site conversion rates (CRO).Analyzed Meta and Google Ads performance data to identify top-performing channels, reallocating ad budget to improve Return on Ad Spend (ROAS). Conducted deep-dive analysis on campaign metrics (CAC, ROAS, CTR) to isolate underperforming ad sets and optimize spend allocation across platforms.
- Defined digital KPIs, used SQL scripts to clean API exports, handled missing data, and verified tracking accuracy to ensure high data quality and consistency across reports.

Quality Engineer - Data Analyst • Continental AG | Atar 136, Novi Sad — Jan 2025 - Dec 2025

- Served as the sole engineering analytical support for Production, HR, OHS, Controlling, and Quality, providing cross-functional performance monitoring, reporting, and operational insights. Developed automated reports and interactive dashboards using Excel, SQL, and Power BI, improving KPI visibility, reporting efficiency, and management decision-making.
- Developed, monitored, and analyzed key manufacturing quality KPIs (defect rates, scrap, rework, production output, workforce allocation, operational efficiency), supporting root cause analysis and identifying performance deviations, key problem areas and bottlenecks, recurring production issues, and opportunities for manufacturing process optimization.
- Developed, documented, and revised quality procedures and work instructions to support QMS implementation and ensure process standardization and continuous improvement. Collaborated with cross-functional teams to maintain QMS compliance, support corrective and preventive actions, and prepare for audits.
- Contributed to IATF 16949/VDA/ISO compliance activities and internal & external audits, reducing losses and improving process stability and product quality. Developed and maintained non-conformity and corrective action tracking processes, supporting issue follow-up, root-cause analysis, and continuous improvement.
- Supported cross-functional budget planning and tracking, consolidating departmental inputs and monitoring workforce, resource allocation, and quality-related costs.
- Coordinated and monitored shop-floor quality technicians, tracking individual and team performance, workload distribution, task completion, and operational efficiency to support production targets and quality standards.

Supply Chain & Inventory Manager • Novus M Plus Trade | Trg Marije Trandafil, Novi Sad — Oct 2022 - Dec 2024

- Managed end-to-end supply chain and inventory operations, including stock monitoring, purchasing coordination, replenishment planning, and inventory availability.
- Analyzed inventory levels, purchasing requirements, and supply chain KPIs to identify discrepancies, implementing corrective actions & improve inventory control. Monitored supplier performance, purchasing activities, and delivery timelines to support restock planning and operational efficiency.
- Developed and maintained analytical reports to track stock levels, supplier performance, purchasing costs, delivery timelines, and operational efficiency.
- Collaborated with suppliers and cross-functional teams to coordinate inventory requirements, resolve supply issues, and align purchasing activities with business needs. Supported management decisions & process improvement through KPI monitoring, inventory, performance analysis, trend identification & the standardization of operational reporting.

PORTFOLIO 20+ analytical & engineering projects in Quality & Process Control, Production, HR, OHS, Controlling

- Scrap Tracking System Development and Tool - Contributed to one of the most important company topics - Reduction of scrap
- Budget Planning Cross-Functional System (collaboration with Controlling)
- Rework KPI Development and Tracking System
- Quality Performance KPI Dashboard Development
- Workforce Allocation & Workload Monitoring
- Support in the development of the Quality Audit & Non-Conformity Internal Tracking Tool
- Training & Qualification Competence Tracking System (collaboration with OHS)

EDUCATION

Master of Science
Engineering Management
Faculty of Technical Sciences, Novi Sad
- **Major in Quality Engineering & Logistics**

Bachelor's Degree
Engineering Management
Faculty of Technical Sciences, Novi Sad
